

## ENGINEERING ONLINE TRAINING

Meet CE/PDH requirements and sharpen skills with the most cost effective, quality solution on the market. RedVector's engineering training courses are crafted for the ongoing continuing education and learning needs of professional engineers working in the construction industry.

- Dynamic learning formats including video, audio-driven and mobile-ready courses
- Highest quality content available, written, reviewed and presented by industry experts
- All courses accredited by national and state bodies
- Continually reviewed and updated to meet new standards

### WHO SHOULD USE IT:

- Civil Engineers (Structural, Environmental, Geotechnical, Transportation, Water Resources, Site Planning/Development, Coastal and Construction Engineers)
- Mechanical Engineers
- Electrical Engineers
- Petroleum Engineers
- Chemical Engineers
- Industrial Engineers
- Geologists
- Land Surveyors

### WHAT'S IN IT (CONTENT):

#### 800+ COURSES

Close to 800 accredited courses cover a wide array of topics including civil, structural, electrical, mechanical, water, concrete, transportation, LEED v4, BIM, ethics and much more.

- Full series of up-to-date Ethics courses
- Live webinars each month offered for live CE credit
- 60 hours of GBCI-approved courses for LEED CMP / LEED v4
- Up-to-date green construction and sustainable design courses
- Full suite of courses for Land Surveyors – for license renewal or general learning
- BIM
- Oil and Gas
- Infrastructure
- Emerging Technologies
- Stormwater/Wastewater

### HOW DO I GET IT:
